Special Snap Frames

Waterproof snap frames

Waterproof snap frames have an in-built gasket to ensure prints are kept dry in all weathers.

As with all our snap frames they are supplied complete with concealed wall fixings and PET poster cover sheet.

Two types of tamper-resistant snap frames:
designed to prevent unauthorised access.

Lockable Snap Frames can only be opened with an allen key. The four sides of the snap frame are interlocked. The last side to close has an allen key type lock for extra security. (Key supplied).

Waterproof lockable frames are for waterproof frames suitable for vulnerable **outdoor** locations.

Secure Frames require a plastic lever tool to open them, as the profile does not have the usual finger-lift groove.

Opti Frames - compact snap frames

✽ Smart Opti snap frames - easy change contents.
✽ For printed notices, photos, door signs etc.
✽ Wall mounted or with integral desk-top stand.

Opti Frames are aluminium snap frames with a moulded rigid plastic back panel. They blend perfectly with other snap frames - with the benefit of extra safety, thanks to the plastic tipped corners avoiding any sharp extremities.

Opti Snap Frames in a choice of colours

Select your colour: **Silver**, **Black** or **Wood effect**.
Poster cover sheet included with all frames. All frames have safety corners.
Frames with an integral support strut are described as counter-top models.
All sizes can be used portrait or landscape (wall or counter).
A6 and A5 frames have 14mm wide profiles. A4 has 25mm wide profiles.

ASO.A4/25C-WD	Wood A4 Opti Snap Frame - counter	10.25	9.23	8.41

Opti frames can be used as photo frames

A6 Silver

Silver finish - the brushed aluminium finish looks good anywhere. Use as a door sign or as a table-top photo frame.
See page 3 for larger size of silver snap frame.

A5 Black

Black painted finish - a popular colour for wall or table-top use. The frame back and optional counter stand are colour co-ordinated too.

See page 4 for larger sizes of black snap frame.

A5 Wood effect

Wood effect - a realistic surface finish is applied to the aluminium. Looks like wood but works like a snap frame: easy to use and durable.

See page 3 for sizes larger than A4.

Acrylic signs - for printed inserts

Alu Eclips System

Alu Eclips is ideal for wall mounted signs and door name-plates. It is intended for printed paper or card inserts.

The rear aluminium extrusion creates a gentle curved form.

A clear lens can be flexed into place to secure your printed paper graphic. Each unit is neatly finished off at top and bottom with a moulded black plastic end cap.

Alu Eclips sign holders are suitable for fixing adjacent to or even directly onto doors without risk of snagging.

MagnitFrame

The **Magic of Gardening**

MagnitFrame
Lift up magnetic cover - Silver or Black

MAG.A3-S

Can be applied to: glass, metal, smooth wood, white goods, food counters etc.

Re-usable adhesive back: MagnitFrames come with a peel-off backing revealing the clear adhesive to allow easy application to most surfaces. The special adhesive allows the product to be removed and reused many times without leaving a residue (on solid surfaces).

Simply open the hinged front panel and pop in your printed paper insert. MagnitFrames can be used portrait or landscape, single- or double-sided.

MagniFrames are self-adhesive poster pockets with a hinged magnetic flap at the front. Both the front and back lenses are transparent so optionally this print holder can be used on glass with a printed sign showing from both sides. There is an attractive border which creates the same appearance from the front or the rear. Available in black and silver versions.

LINFOR.A7

LINFOR.A8

LINFOR.A4

Linfor's clear lens is flexed into place and held captive within the rigid plastic body, until you need to change your message.
Linfor is a range of super slim print holders made from crystal clear plastic. The rigid body can be stuck permanently to many types of substrate using the supplied strips of strong transparent adhesive.

Permanent clear adhesive strips are supplied for fixing.

186.30.16 (306)
Clarendon Laboratory

Mr. V. Goodwith-Figures
Chief Accountant
LINFOR.A7

Linfor print holders are so discreet and slim they can be used in any indoor situation. Available in all standard paper sizes (please see inside front cover for paper dimensions). These virtually frameless holders can be used on office doors, as cupboard labels, on glass cabinets or partitions - but they are equally at home fixed to your wall for fire notices and general signage applications. They can be used landscape or portrait, and on glass they can be used for double-sided display.
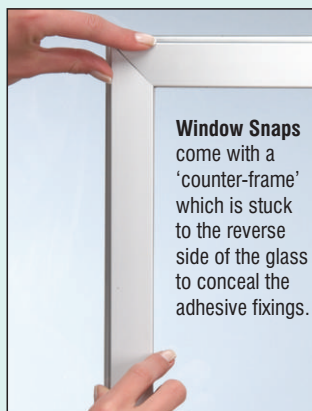

Linfor

Linfor frames are supplied with adhesive strips and can be used portrait or landscape.

Window Wizard

Window Wizards are self-cling clear poster pockets for paper inserts which can be reused many times and leave no residue.
They are suitable for securing posters on all types of window, glazed doors, aquariums etc. The clear plastic sleeve is electrostatically charged to help hold signs securely.

For paper size info see inside front cover

Window Wizards

Order Code		£ ea	20 @	50 @
WW.A7	A7 Window Wizard	1.55	1.40	1.27
WW.A6	A6 Window Wizard	1.95	1.76	1.60

WW.A2	A2 Window Wizard	8.15	7.34	6.68
WW.A1	A1 Window Wizard	11.10	9.99	9.10

Window Wizards work on most types of glass, acrylics and white goods. They can be used landscape or portrait, single- or double-sided.

Window Wizard has strips which cling when smoothed onto clean glass (apply inside window).

Window Snaps come with a 'counter-frame' which is stuck to the reverse side of the glass to conceal the adhesive fixings.

Window Snap Frame – for double-sided poster display on windows

Window Snaps

Snap frame with clear back sticks onto one side of the window with a dummy frame surround stuck on the other side.

* ✱ Ideal for retail POS including outdoors.
* ✱ A5, A4 & A3 sizes fit laminated or plain paper.
* ✱ Optional poster protectors available.

Correx backing sheet is included with every Slim Frame

PRINT
Laminated PRINT
Chalk Card
Poster Protector

**PRICES** for Poster protectors, Laminating pouches: See page 34   Chalk cards: See page 54

Square-corner Slim Frames are sized to take laminated prints.
The premium **Silverline** finish (above) is achieved by applying an attractive matt silver coating over the plastic frame.

Durable outdoor grade ABS plastic is used to mould frames with a poster insertion slot.
Indoors, printed paper inserts can be slipped in behind an optional poster protector sheet.

Keyhole Wall clip up to A3 **OEK.145**
Wall Clips are a popular way to fix Slim Frames by screwing:

OEK.145 fits A5, A4 and A3

OEK.235 and OEK.235s both fit A2 and A1 size frames.
With these larger size frames the '**s**uperior' version is preferable for outdoor use. *(Screws not included)*

Slim Frame plastic sign holders

Slim Frames are very versatile - e.g. fix outdoors or for indoor table-top use etc. So the same colour and style of frame can be used throughout the store - with different fixings as required.

Feet for Slim Frames

Slim Frames with snap-on feet can be used portrait or landscape. They are resistant to breakage when dropped. Feet come in two versions: Angled or Upright (frames can be used double-sided).

Snap-on feet - upright or angled   Colour: Clear

Order Code		£ pr	100 pr

Exoclip - the versatile card clip

Exoclip is a well designed card clip moulded out of high grade polycarbonate plastic. The clip is suitable for holding card or stiff plastic up to 1.2mm thick.

Exoclip works well up to postcard size or can be used in pairs for larger cards. There is a choice of 3 colours. Being dishwasher safe it is suited to deli counters and labelling items in food displays.

The clip is also suitable for use in a handwritten sign environment teamed up with our A7 Chalk Cards and Chalk Pens (see page 55).

FreeStanders with choice of base

A4 or A3 Slim frames can be fitted portrait or landscape. Simply slot in your print, sign or notice.

All poles are height adjustable from 1m up to 1.8m. Choose the right base to suit your own application.

■ Basic Base FreeStander

Basic base - tough, heavy and made from dense 100% recycled material.
Suitable for use indoors or outdoors.
Note: Stability is not assured in windy conditions. Weight approx 3.5kg.

■ Covered Base FreeStander

Covered base - a top cover adds visual appeal to Basic base where a more refined look is desirable. For use indoors and outside.
Note: Stability is not assured in windy conditions. Weight approx 3.5kg.

■ Flat Base FreeStander

Flat base - this flat metal base lends itself to retail situations where merchandise can be stacked on and around the base.
Powder coated paint finish is suitable for limited outdoor use. For sustained outdoor use we recommend the Basic base.
Weight approx 2.5kg.

Silverline

Silverline models are considered the smartest of our Slim frame FreeStanders. The attractive matt silver finish is carried down from the frame through to the base.

Silverline models have a circular flat steel base which is stable in most situations. As with all our FreeStanders the frame height can be adjusted with the telescopic aluminium pole.

Floor sign holders with Slim Frames

✱ All these floor signs are supplied with Slim Frames - the slot-in style frames for quick message update.

Frames can mounted any way round to suit landscape or portrait format.
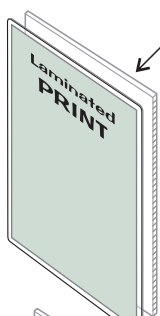

A Correx backing sheet is supplied with every Slim Frame.

All frames fit either plain or laminated standard A4 or A3 size paper.

Plain paper inserts can be covered with optional Poster Protectors - but this will not make it waterproof.

For use outdoors use laminated paper signs or print your signs on a waterproof medium.

Single Sided   **Double Sided**

Correx backing sheet is supplied with every FreeStander

FreeStander Tilt with Basic or Covered base

Tilt has a fixed angle T-piece and a short fixed-height pole. Height: 500mm pole plus frame.

Basic base

Covered base

FreeStander Meso with Covered base

Meso is a mid height FreeStander, similar to the Tilt but with a straight head. This enables double-sided use if required.

Wind Stability
A4 Meso and Tilt are generally wind-stable outdoors. A3 Meso and Tilt are supplied as standard with a heavy duty T-piece for extra frame rigidity in outdoor use. The A3 size should prove wind stable in most situations but the larger frame size makes A3 more susceptible to toppling than A4 in exposed situations.

The reduced height compared with full-height FreeStanders also makes these products a good choice where wind stability is a selection factor.

Panel Clamp

Above: Panel Clamp holding 10mm foamcore display board.

Below: Double-sided application with 3mm foam PVC.

Floor stands for rigid panels

＊ Panel Clamp is perfect for holding graphic display panels.

Panel Clamp FreeStander

This design from Green Magic provides an incredibly versatile product for displaying:

■ Rigid graphic panels from 3mm to 10mm thick.
■ Snap frames and similar poster frames up to A1 size.
■ Small blackboards etc.

How it Works

Panel Clamp FreeStanders can be used single or double-sided.

The top and bottom Panel Clamp bars are both adjustable in height. The bars can be used either way up e.g. to clamp **over** a board OR lip **inside** the rear rim of a frame:

■ Clamp bars are 300mm wide (panel width can be 900mm plus, subject to stability considerations).
■ Suits panels up to 1.2m high (1.8m to top of extended stand).

Panel Clamp FreeStander

CHKB.46	Eco Wood Chalkboard 310x510mm	12.50	11.25	10.25

Panel Clamp used to hold a wood-frame blackboard (available as an accessory together with chalk pens).

Panel Clamp used to secure a black A1 snap frame with easy poster change.

Panel Clamp FreeStanders are supplied with a height adjustable pole and a Covered base. They are for indoor applications as larger panels will cause the stand to topple if used outside.

Panel Clamp used to display a 1200 x 900mm (4ft x 3ft) sign mounted on 10mm foamcore board.

Rear view of blackboard showing how the Panel Clamp bars have both been 'turned over' to lip inside the back of the frame - providing concealed support.

Presenta Flexi

Presenta Flexi
A totally flexible product - that's where it gets its name Flexi.

The adjustable angle head can be tilted from vertical through to horizontal and locked at the desired angle. Even cleverer, the frame can be switched from landscape to portrait and back just at the turn of a knob.

Presenta Flexi is also an adjustable height poster stand so it can be adapted for any poster display application. Simply open the lever catch and slide the inner post to the height you require. Then pop your poster, print or notice into the snap frame. Like all our snap frames it is supplied with a clear poster cover sheet.

The frame can be switched easily from portrait to landscape

Presenta Flexi A3
PRESF.A3

Presenta Deco

Presenta Deco is a fixed height stand. It has a moulded base with metal inlay for stability. A4 and A3 frames have to be ordered as either portrait or landscape.

Presenta Classic

Presenta Classic

PRES.A4

PRES.A3.D

Presenta Adjusta

Presenta Adjusta

PRESA.A4

Presenta Classic has a sturdy metal base.
The A4 model has a portrait frame and single leg: height 1.0m.
The A3 model has a landscape frame, twin legs and a larger
base for stability: overall height is 1.2m.

Presenta Adjusta (right) **is adjustable and can be further
adapted with useful brochure display accessories.**

Presenta Adjusta has an upright (as opposed to angled) head.
The frame height and orientation can be adjusted (frame needs
to be removed and re-attached) and additional frames can be
added - creating a double-sided sign stand.

Pole heights are as follows: A4 model 1.3m high   A3 model 1.5m high

Addition of brochure holders for Presenta Adjusta

We offer various brochure display shelves and containers which
can be added easily during initial assembly of this product. Any
of the illustrated configurations can be achieved by adding the
appropriate accessory.

**Choose the accessories
you need to create your
perfect display solution.**

Pressto aluminium base

Pressto's distinctive aerofoil form securely holds rigid panels of any thickness from 1 to 15mm upright, delivering a very high quality of presentation.

Design: Aluminium base available in several widths with a clever clamping mechanism using a knurled knob to tighten from below. Integral fine rubber strips protect panels while ensuring a good grip.

Two finishes are offered: silver anodised or black. The black version is supplied with black end caps - these can also be ordered as an accessory for the silver bases.

Applications: Pressto can be used singly, or in pairs to support larger panels. We advise panels should be restrictied to1500mm high. Various panel materials ranging from foam PVC to tempered glass can be used (in the correct thickness to suit the rigidity of the panel material). Outdoor use is possible with small panels (to avoid over-toppling).

KD.PT200SZ	Black Pressto 200mm +4 caps	90.00

Panel thickness 4-15mm or 30mm with clamp bar in upper position.

The joiner profile can be inverted to increase the adjustment range - for thick or thin graphic panels respectively. Black moulded caps (below) can be used to close off both ends.

❋ **Monolith Bases** are versatile - use to support various rigid panels.

❋ You can customise **Display Panels** to your own requirements.

Monoliths can be easily adapted to the way you wish to display information (for indoor use).
BASES: There are two widths of sturdy steel base, both finished in silver (500mm or 750mm wide). Each base is in two mating halves which are joined underneath with concealed bolts. These bolts pass through the panel, clamping and supporting it.

PANELS: We stock two sizes of **aluminium composite panel (Dibond)**. These white gloss panels are 4mm thick 500mm or 750mm wide by 1500mm high. Poster frames and/or graphics can be applied easily. The panel top edge is finished with a poster snap rail for safety.

Note: other types of rigid panel can also be used. We advise 1500mm high to ensure stability.

LEAFLET DISPENSERS in clear acrylic can be supplied with adhesive tape ready to fix.

Description of the Monoliths pictured.
Monoliths pictured are 500mm wide x 1500mm high.

1 4mm Dibond panel with A2 snap frames each side plus leaflet dispensers fixed with strong tape.

2 4mm Dibond panel completely covered with digitally printed applied vinyl (or direct printed) graphic.

■ Monolith Bases, Panels and Accessories
NOTE: Codes with /AD suffix indicate the item is supplied with adhesive tape pre-applied, but not actually attached to the panel (you position where you wish). Codes with /FXD mean the accessory is factory fixed to the panel.

2
Panel Trap Base

❋ **Panel Trap Bases** offer an economic alternative for supporting rigid panels of your choice.

PANEL TRAP BASES:

This range of steel bases perform a very similar function to Monolith base. Panel Trap is supplied in two halves which bolt together through any panel of your choice.

The bolts supplied are sufficiently long to accept a range of panel thicknesses. They tighten with supplied wing-nuts to lock the panel in position.

31

Wall fixings for sign panels

Midi

Midi stand-offs are high quality wall fittings suitable for fixing many types of sign substrate which can be drilled with an 8mm hole - normally a hole in each corner.

The rear part of the Midi is first screwed to the wall. The front part of the fitting holds the panel in place and is secured with a tiny grub screw and allen key (included).

The panel stands 21mm (3/4") away from the wall.

Midi fittings are available in three finishes: shiny chrome, matt silver and polished gold. The head diameter is 15mm. They suit panels up to 11mm thick. The fittings are suitable for indoor or outdoor use.

KD.STEEL20	20mm Steel stand-off fixing	5.25	4.73	4.31

Stand-off wall fixings

Steel
Stainless Steel fittings are especially stylish. They work like Midi fittings (with a discreet allen screw) so panels are secure even when used outdoors in vulnerable public areas. **Steel** fittings can be used with materials such as acrylic, Dibond or metal plaques.

There are two popular sizes, each suiting panels up to 11mm thick drilled with 8mm holes: **15mm** or **20mm** diameter (also standing off the wall 15mm and 20mm respectively).

CLAMPER and Clamper plus glass (set)

Order Code		£ ea	10 @	25 @
CL.100	Clamper 100mm wide	13.90	12.51	11.40
CL.GL.150	Clamper 100 plus 2x150mm Glass	23.90	21.51	19.60
CL.200	Clamper 200mm wide	19.50	17.55	15.99
CL.300	Clamper 300mm wide	26.00	23.40	21.32
CL.400	Clamper 400mm wide	33.25	29.93	27.27

Clamper - wall panel holder

Profile depth is 23mm and the panel is set 22mm off the wall

Clamper is used to mount panels of any type from 3mm up to 10mm thick onto walls. Depending on the panel size Clampers can be used singly or in pairs.

The panel does not need to be drilled. The base aluminium profile is first fixed to the wall. Then the clamping profile is located and tightened from below with allen screws, after introducing the panel.

Clamper can be used with twin glass plates with a graphic or door nameplate insert sandwiched between (pictured left and right).

The 150mm square version can be ordered as a stock item - see price table. Various lengths of Clamper are supplied to suit larger panels.

Printers and Printing

Sheet Media

EnLabel

EnLabel is a user friendly yet powerful design tool for creating any size label - from shelf edge up to large format. It is equally at home outputting to a colour Epson label printer (below) as it is to the 42" wide Epson large format printers on the next page.

EnLabel Professional Design & Print v5 **£395**

Try before you buy
We are offering a 30 day FREE TRIAL of EnLabel

EnLabel is an excellent design tool for large format printers. It works equally well with text, images, style templates etc.

TM-C3400

Colour label printer

Epson TM-C3400 is an amazingly fast label printer which will output any size label or sticker (up to 104mm /4" wide) in perfect colour.

CALL for details!

TM-C3400's pigment ink performs well outdoors, whether you're labelling pots or racks, from small price tags to long strips. It works with any Windows programme, and it's a great partner for EnLabel.

There is no need to stock different size labels. It chops them on the fly - at up to 1000 labels per hour. The labels won't smear in wet conditions and will resist fading for months.

Tack Jet adhering film for inkjet

Tack Jet is a white plastic with a coating which is highly receptive to inkjet print. After printing peel off the backing film and stick it directly to windows - or almost any smooth surface. Remove and reposition the decal without leaving any residue! (Please test on new surfaces).

Order Code	Tack Jet adhering film	Pack Qty.	£/pk
TJET.A4-50	A4 Tack Jet	50	48.00
TJET.A4-5	A4 Tack Jet (trial pack)	5	9.00

Coated paper for inkjet

Top Color sheet media is suitable for sheet-fed inkjet printers. Your results will be much better than using low cost copier paper! Colours will be vibrant and last better. For use outdoors needs to be laminated.

Order Code	Top Color inkjet paper	Pack Qty.	£/pk
FOT.A4	A4 Coated paper 120gsm	200	20.00
FOT.A3	A3 Coated paper 120gsm	200	42.00
FOT.A2	A2 Coated paper 120gsm	100	44.00

Waterproof media for laser

Longlife film is made of tough outdoor grade polyester. When printed in laser printers it can be used outside without laminating. N.B. Longlife is not for inkjet printers.

Order Code	Longlife Film	Pack Qty.	£
LL.A4	A4 Longlife Film	100	38.00
LL.A3	A3 Longlife Film	50	41.00

Micro-perforated paper

Micro-perforated paper in A4 sheet form simplifies the creation of printed labels and price tickets. We offer all standard sizes to fit our smaller frames or Flip-up barkers and also for standard 39mm high data strip. See below.

Perforated paper is an ideal partner for **EnLabel** users with an A4 printer (paper is laser and inkjet compatible).

Choose the label sizes you need and add the suffix to the order code. e.g. A4.25-QTR for 25 sheets of 1/4A4 labels.

Order Code	Perforated paper	Pack Qty.	£/pk
A4.1000-	A4 Perforated paper	1000	99.00
A4.500-	A4 Perforated paper	500	65.00
A4.25-	A4 Perforated paper	25	6.95

Microperf DL size (1/3A4)	Suffix **-DL**	Microperf Quarter A4	Suffix **-QTR**	Microperf A7 (74x105mm)	Suffix **-A7**	Microperf Data Strip (38x105mm)	Suffix **-DS1**	Microperf Data Strip (38x70mm)	Suffix **-DS2**

MICROPERF A4 SHEETS

Laminating and pouches

Robust metal case
High speed

PEAK Pro Laminator

PEAK Professional Laminator
(stocked in A3 & A2 sizes)
is a heavy duty laminator for the busy office or shop. Its sturdy metal case and robust construction mean it should out-perform and outlast budget models.

Features include:
- Variable speed control for different pouch thicknesses.
- Takes pouches up to 360 micron.
- Fast - up to 560mm per minute.
- Anti-jam reverse mode.
- Hot roller system for bubble-free use.
- No carrier required in standard use.

Strictly speaking this process is encapsulating. Laminating can imply just the top face is sealed, but we mean fully sealed.

Laminating creates a water-proof seal around your print.

Our Slim Frames are sized to accept standard paper **or** laminated prints.

Standard paper
Laminated print adds 6mm

Poster Protectors

Poster Protectors offer a cost-effective solution for keeping paper signs in pristine condition. Used indoors (they do **not** make the frame waterproof) they save the time and cost of laminating successive signs. They are made of non-reflective clear PVC material.

Poster Protector

Snap frame covers are thicker than poster protectors and made from superior PET. For snap frame replacement covers please carefully select the correct code.

Laminated prints perform well outdoors or in any wet environment

Roll Media

Roll Media - how to choose which to use

Folajet Wondermedia ★★
Tough coated polypropylene media. High quality prints.
Waterproof - fine outdoors for many months.
Easily cut down to make smaller size outdoor grade POS.
Tear-proof for indoor drop banners.   180 micron thick

ColorFul poster paper ★★
Very economical for indoor posters and trial banners.
Thicker grade can be used for drop banners (hanging).
Not waterproof or tear-proof. Two thicknesses available:
approx equivalent to Epson Single- and Double-weight.

Outdoor Adhesive Vinyl ★
Peel off the liner after printing and apply to back board.
Sticks very securely to a wide range of substrates.
Needs some practice to apply successfully. 80 micron thick

EziStick with low-tack adhesive ★
Outdoor or indoor use with good quality print results.
Peel off the liner after printing. Apply to walls, glass etc.
Easy to use. Remove or reposition without residue.
Always test first as it doesn't attach to all substrates.

Heavy-duty Banner Fabric ★
Outdoor or indoor use with high quality print.
Hangs very well as a drop banner - no curl.
Also successful for back-lighting in light boxes.

Tack Jet (left) is ideal for window stickers and many other uses. It adheres to most surfaces and is completely removable. Available in rolls or in A4 sheets (see page 34)

Tack Jet adhering film ★   **NEW!**
Outdoor or indoor use with excellent non-smear print
quality. Peel off liner after printing. Adheres like self-
cling to glass and metal. Also use on smooth wood,
PVC, Correx and many other surfaces. Remove or
reposition without residue.

Flag Fabric
Lightweight knit, semi see-through. Hangs very well.
After printing discard the backing liner sheet before use.

Photo paper
For the highest quality print results - gloss or satin.

Backlit film
Opal film designed for use in light boxes.   120 micron thick

Approx Costs per A1 Poster

For a poster with 25-30% overall ink coverage:

	Ink Cost	Paper	Total Cost
Poster paper	£2.25	£1.00	**£3.25**
Wondermedia	£2.50	£3.00	**£5.50**

Roll Media for large format printers

**Epson's latest printers
produce stunning results on
a wide range of media -
including indoor and outdoor
banner materials. They are
also quick and economical.**

* Superb hi-spec graphics and banners up to 24"
  or 42" wide depending on printer model.
* Light-fast UltraChrome pigment inks, giving
  stunning photo quality output.
* Prints on a wide range of media - including
  Wondermedia and other outdoor media types.
* Connects to any PC or Mac direct or networked.
* Very fast print speed and excellent reliability.
* Comes complete with a set of inks and a stand.

Today's generation of Epson printers includes our two featured
models which we consider ideal for POS production in any retail
environment. The only difference between them is the width of
the machine and therefore the roll widths they will print on.

These are 4-colour machines and the print heads are 'doubled
up' for really fast output. The inks are light-fast outdoors for 6-9
months without lamination, when combined with the waterproof
media which we supply (see opposite page for full details).

Although they are large printers they work like ordinary office
printers. You can often use existing graphics software to design
posters and banners. However we recommend and support
EnLabel software introduced on page 34.

Suspending graphics
Poster Snaps

Poster Clamps
Extra wide Poster Clamps can be achieved simply by using Joiners.

These are supplied as a pair, one for the top rail and one for the bottom.

The black end caps are removed and the Joiner introduced and tightened - making a strong finished assembly.

✱ Poster Snaps are great for suspending larger POS and drop banners.

✱ Poster Clamps grip even more securely, yet the posters can be changed easily.

Poster Clamps

The price per set includes a pair of black hangers which slide into the top rail.

Order Code	Per set (top and bottom rail)	£ ea	20 @	50 @
PC.42	Poster Clamp 420mm (A2 portrait)	7.50	6.75	6.15

PC.JOINER	Pair of Poster Clamp Joiners	4.69	4.22	3.85

Poster Snaps are snap-action poster and banner holding rails. The smart anodised aluminium finish is attractive and durable.

Each set comprises a top and bottom rail (weight of lower rail tensions the poster). Poster Snaps grip most materials securely.

Poster Clamps are ideal for heavy duty applications where a really secure grip is required (up to 500 micron thick).

Both types have slide-along hangers for easy suspension.

Hanging banners can make a tremendous impact in any retail situation, helping to create style and ambiance.

To be effective they need to be well presented - as pictured left. Poster Snaps and Poster Clamps offer a professional and fully reusable solution.

Poster Snaps

Order Code	Per set (top and bottom rail)	£ ea	20 @	50 @
PS.30	Poster Snap 300mm (A3 portrait)	5.50	4.95	4.51

Cable displays

Standard kits £

Cable display kits complete with 4.0m floor-to-ceiling cables (which can be cut to length), plus all required fittings and clear acrylic easy access poster pockets are supplied as sets - in two versions.

Standard Chrome version has shiny fittings with inbuilt tensioning springs in the lower fitting.

Fly Mini version uses premium quality matt silver components, with the added benefit that the fittings at either end of the cable can be ceiling or wall fixed as required with an inbuilt clutch to grab the cable.

In this illustration cables are represented as 1.6m long
Kits are supplied with 4.0m long cables

Cable displays need to be fixed securely and setting out should be done accurately. Please verify that suitable fixing points are available and use appropriate screws and wall plugs. A reasonable level of practical skill is required.

Extra parts: The kits listed here are the most popular but additional acrylic poster pockets, cable fixings and other individual components can be ordered as required. POA.

Fly Mini - the cable display system with Italian styling £

Fly Mini is design-led premium cable display system. The beautifully styled top and bottom fittings each allow for ceiling **or** wall attachment. Fly Mini raises the game in prestige spaces.

Poster Pockets are stocked in sizes A4 to A2 made from clear acrylic. Changing your print is easy - just slip it in.

In shop window situations prints can be inserted back-to-back.

The picture shows a **Fly Mini** cable system. These fittings are dual use - for ceiling to floor or wall fixing. Cable tension is created by turning the screw-cap on the lower Swing fitting which tightens the wire.

49mm

70mm
Double-sided snap frames

Double-sided snap frames are for suspending on wires or for floor to ceiling cable displays.
Hook-end cables (opposite) are ideal for supporting individual frames. Each frame is supplied with suspension eyes.

When stacked one above the other Stopper is best choice.

Stopper provides clutch height adjustment with locking feature

Stopper

Double-sided snap frames can also be threaded onto a cable system. In this case the wire goes down through the middle of the frame and another can be fixed beneath.

Stopper provides finger-tip height adjustment of each tier.

A3, A2 and A1 sizes can also be ordered in landscape version.

Chrome

Urban Trapeze is a great device for making adjustable cable loops. Use it to attach to rafters or loop it through whatever you need to hang.

Simply insert a cable (wire up to 1.5mm) into the arrow guided clutch: the built in locking mechanism grips the cable automatically. To release, just press the clutch button and the cable is free to move back and forth to achieve the desired height.

WATER-FILLED signboards

Windcheater

WCE.A0

Windcheater is our superior quality water-base pavement sign.   It offers excellent wind stability thanks to the extra large water-filled base and robust springs to deflect the wind.

Snap frames on both sides include a waterproof seal to protect posters.

Integral wheels mounted on a steel sub-frame mean that the Windcheater can be moved easily or wheeled in at night, if required.

Windcheater and Sentinel prices

Order Code	Description	£ ea	5 @
WCE.A1	A1 Windcheater + water-fill base	180.00	162.00
WCE.A0	A0 Windcheater + water-fill base	210.00	189.00
SEN.30.40	30"x40" Sentinel + water-filled base	350.00	315.00
SEN.A0	A0 Sentinel + water-fill base	399.00	360.00
SEN.40.60	40"x60" Sentinel + water filled base	499.00	449.00
SEN.TROL	Sentinel trolley*	31.00	27.90

* Sentinel has wheels but it is easier to move with the optional trolley to jack up the other end.

Sentinel

Sentinel forecourt signs can be found at countless filling stations and retail parks.

The poster frame is closed with a high quality magnetic cover, making poster change simple. A silver border around the poster creates a striking impression. Sentinel really is a pavement signboard for the professional. For store roll outs there are various branding possibilities.

WindPro - Black

WindPro is now available in black. With a black poster frame and matching water-filled base, this new version of our popular pavement sign board imparts a smart modern image.

Currently only available in A1 size - prices opposite.

A special foam gasket and over-sized cover sheet makes the frame waterproof.

Wheels incorporated into the water-fill base mean that the unit can be moved easily or wheeled in at night.

Magnetic D-top A-board

D-shape top panel can be used to display your logo or brand name.

Magnetic poster cover recessed into a painted steel tray keeps posters clean and dry.
A concealed release hole makes removal simple when it's time to change your poster.
Tubular steel legs, logo plate and poster cover border are colour matched - either white or black.

ABD.A1-W

D-top A-board with magnetic poster cover

Order Code	Description	£ ea	5 @
ABD.A1-W	White magnetic D-top A-board	110.00	99.00
ABD.A1-B	Black magnetic D-top A-board	110.00	99.00

WindPro - Silver

WPR.A1

WindPro water-filled bases have integral wheels for moving the sign around. A set of four springs allow just the right amount of flexing to spill strong winds. The standard finish is silver/grey.

Waterproof gasket behind the poster cover makes it 100% waterproof meaning that ordinary paper prints can be used at low replacement cost.

WindPro pavement signs are excellent value and are popular in many situations: high street retail, garden centres, event management, churches etc. Posters can be changed with ease.

WindPro - Silver and Black versions

PAVEMENT A-boards

Snap frame A-boards

AB.20.30

AB.A1

- Snap frame A-boards offer easy poster change.
- For use outdoors and inside. Easy to bring in.
- Smart and durable aluminium construction.

Plastic chalk card inserts are available for use with chalk pens (see page 54).

Poster protector sheets are included with every snap frame A-board. These provide some protection against the elements but unlike the water-filled base versions they are not 100% waterproof.

Size	Fits Posters (mm)	Approx (in)

Premier Chalk

Small Premier Chalk is 897mm (35") high by 671mm (26") wide
Large Premier Chalk is 1164mm (46") high by 838mm (33") wide
Wood version is made from softwood (from renewable sources) with dark oak finish and matt varnish protection. Fully assembled and boxed.

Blackboard A-boards

Premier Chalk is a range of premium quality blackboard A-boards with slide-in reversible write-on boards, made of very durable high pressure laminate.

Available with either a wooden or a steel frame powder coated black. Both sizes are suitable for external use.

Ideal for use with Posterman chalk pens or blackboard chalk.

AB.PRW.S

Lightweight Chalkboard

Lightweight Chalk A-board is a low price blackboard floor sign which can be used with chalk pens. It folds away for storage.

Mainly recommended as an indoor or mall product as it is too light to be stable in windy outdoor situations.

880mm (35") high x 500mm (20") wide

SPECIAL OFFER

Type 10

Pallet Pogo

✱ Quick to fit POS holder for any type of pallet.

✱ Secure spring-loaded attachment system.

✱ NEW - durable lacquered zinc plate finish.

PALLET POGO

Available frame colours: Black, Green, Dark Green

Order Code	Midi stand-offs	£ ea	10 @	30 @
PP.A4	Pallet Pogo with A4 Slim frame	35.00	31.50	27.80
PP.A3	Pallet Pogo with A3 Slim frame	36.00	32.40	29.52
Pole height is 850mm (4ft to top of A4 frame).

All Pallet Pogos are now supplied with larger size T-piece for extra strength.

Easy to use

1 Position base plate under the pallet. Compress spring.
2 Swing top gripper in under the pallet.
3 Release spring to engage - with the 'teeth' out of sight.

Skipper

✱ Skipper is an outdoor retractable safety barrier.

✱ Skipper is a wind-stable sign holder.

✱ Base weighs 14kg when filled with water.

Skipper is equally suited to cordoning off an outdoor area or serving as a wind stable outdoor sign holder.
It is available in green and orange versions, with reflective visibility bands.

Skipper's retractable tape cassette houses a 9m long self-tensioning tape (hi vis stripe). The A4 size Sign Holder comprises an acrylic pocket which locates in a rigid frame. The sign holder can be selected in combination with the tape or without it. Another variant acts as a receiver pole (for use at the end of a line of posts). There's also a wall receiver plate option.

Shopping Baskets / Rolla Baskets

Shopping Baskets and **Rolla Baskets** are moulded from good quality UV stable plastic. They are very durable and practical.

The **Rolla Basket** has a retractable pull-along handle and is fitted with wheels. The large 43 litre capacity will help maximise sales.

Our sturdy **Shopping Baskets** are available in two sizes: 22 litre and 28 litre. The larger basket is ideal for retailers with bulky goods. Customers have room for more purchases - which makes for more sales!

Flip-up Barker

Flip-up barkers offer an effective and economic way to attach promotional information to any shelf fitted with data strip. Used by the thousand in stores ranging from supermarkets to garden centres.

See opposite for prices ▶

Data Strip

DS.LS39
Data strip to clip onto Tegometall type shelves

DS.HEL39
Data strip to stick onto shelf tops

DS.DBR39
Data strip to stick onto shelf fronts

Data Strip is used for displaying shelf-edge labels. It is ideal for EPOS systems and general pricing.
We stock three styles of data strip which suit most situations.

All three are designed for labels up to 39 mm (1½ in) high, with clear fronts. We stock in 1m lengths. Other styles, lengths (and colours) are available, but min. order quantities apply.

DS.LS39 fits Tegometal and some other popular makes of metal shelf. In many cases it will clip on at a choice of two different angles.
DS.HEL39 has a wide top section with self-adhesive strip for fixing onto shelf tops. **DS.DBR39** is for attaching to vertical shelf fronts and racks. *Samples are available to check fit - please call.*

Shelf edge promotion

Klick Frames

**IF YOUR SHELVES HAVE DATA STRIP
WE RECOMMEND FLIP UP BARKERS**

Klick frames are effective shelf-edge barkers, for shelves without data strip. Shelf-edge clips simply "klick" into the backs of the frames. There are clips for many specific types of shelving.

We stock two sizes of Klick frame. Both are ideally suited to in-house sign making: **1/4 A4** allows 4 'tickets' per A4 page   **A7** 8 per page.

Chalk Cards

* **Chalk Cards are black plastic write-on inserts**

Chalk Cards are waterproof when used with Posterman pens and can be erased and re-used*. They are intended for use inside a frame as they are flexible. (A5 can be used in PVC track).

PLEASE NOTE: *Chalk Cards are a consumable item with a limited life. The larger sizes should not be subjected to strong direct sunshine or used behind a clear poster cover sheet as they can distort permanently if they get too hot.

Chalk Cards
A5 size is suitable for use as 8in x 6in bed-card   *Chalk cards are black*

Posterman pens

POSTERMAN pens are ideal for hand-written POS signs. They are waterproof and fade resistant outdoors. Yet they can be cleaned off many surfaces - such as glass, chalkboards and Correx using Mr Muscle Window & Glass cleaner.

There are two standard nib sizes, Chisel for smaller sign writing and Big 'n Broad for doing bolder signs.

ILLUMIGRAPH pens are perfect for indoor use. They can be cleaned off smooth surfaces such as our chalkboards simply using a damp cloth. There is a choice of two nib sizes. The pointed tip of the chisel pens can be used for fine detail.

PMA-50
6 mm

The **Posterman** and **Illumigraph Chisel** point is excellent for normal size signs and adding detail to larger signs.

PMA-120
15 mm

The **Big & Broad** nib below is perfect for larger writing.

Posterman and Illumigraph pens

Please state required colours or leave us to select for you by indicating: 'Mixed set for blackboards' 'Set of 8 assorted' 'All black for labels' etc.

For larger boards and A-boards we recommend a mix of the two nib sizes.

Order Code		£ ea	6+ @
PMA.50	Posterman 6mm Chisel pen	2.75	2.50
PMA.120	Posterman 15mm Big 'n Broad pen	4.50	4.00
PMA.510	Illumigraph 6mm Chisel pen	3.00	2.80
PMA.720	Illumigraph 15mm Big 'n Broad pen	5.00	4.60

Popular colours for Posterman are:
Black, white, red, green, yellow, pink, blue, light blue, flo green, flo yellow or flo pink. Flo stands for fluorescent.
Popular colours for Illumigraph are:
White, red, orange, green, yellow, pink, light blue and violet.
All Illumigraph pens are fluorescent. Try a set of 8!

Lockable Poster Cases

Lockable Poster Cases
are intended for displaying individual posters or single sheets which fill the whole case. Available in popular paper/poster sizes, they are equally suitable for indoor and outdoor use. They are supplied with wall fixings and two keys.
Depth of frame: 30mm   Profile width: 45mm

Home Made
SOUP of the DAY

Nutritious and Delicious

Lockable poster cases offer these benefits:
• **Waterproof**
• **Shatter-resistant front**
• **Secure**

They can be used with the door side-opening or top-opening (stay holds door open). Clips hold the poster in place.
Standard sizes:
A4, A3, A2, 20''x 30'' (single lock) and A1, A0, 30''x 40''(double lock).

Stay (to hold door open)

NOTE
Poster Cases are for single sheets. When displaying two or more notices together we recommend one of our Notice Boards (shown adjacent).

Light boxes for illuminated posters

LED is the new state of the art for backlit poster frames.

Single-sided Smart LED light box ■

- 60% energy saving compared with fluorescent tubes
- Long life light source with no costly tube maintenance
- Incredibly slim design snap-opening frame, single or double sided

**Light attracts
Light sells**

Whether in a retail shop window, a museum or a showroom the power of illuminated images cannot be over-stated. Images come to life, by day and by night.

Smart LED Snaplight is a superb slim edge-lit light box, with a sleek aluminium case just 19mm (3/4in) thick.

Single sided version is for wall mounting - fixing hardware is included.

Easy poster change

Each Smart LED light box has a front opening snap frame complete with an anti-glare PET poster protector.

Plug and transformer included

All Smart LED light boxes are supplied ready-to-use straight out of the box. There is an on/off switch on the edge of the frame and a separate power lead is included to connect the light box to a standard 13A socket.

This is a low voltage device and a neat transformer is incorporated into the plug. All units are PAT tested and come with quality certification.

Double-sided Smart LED light box ■

Double sided version of the Smart LED light box is for suspending in situations where the illuminated poster frame can be viewed from both sides. Hanging hardware is included. Double-sided Smart LED light boxes are just 27.5mm thick.

The internal light diffusion panel in Smart LED creates a bright and very even illumination.

Update your posters in situ

There is no need to take down the light box to change your poster or Duratrans.
Simply snap open all four sides of the frame and change your image.

LED illumination has many advantages

LED is the longest life light source (no tubes to change every year or two) with the lowest running costs. These valuable features are combined with bright illumination, cool running, excellent reliability and no maintenance for up to 100,000 hrs.

The true life cost of LED (light emitting diode) light boxes is actually significantly lower than other light boxes because of the energy efficiency factor. The environmental advantages of lower energy use represent a further persuasive argument.

**Light boxes on this page are illuminated
by conventional fluorescent tubes.**

Convex snap light box ■

Convex Lightbox is for wall mounting indoors.

It is backlit with a T8 fluorescent tube behind an opal back panel.

Access to posters is by snap frame extrusions down each side of the frame.

This is a simple attractive curved-face lightbox - ideal for display of illuminated menus.

It can be fitted portrait or landscape.

Lumi Totem ■

Lumi Totem is a stylish and practical floor-standing light box.

Display eye-catching illuminated images and posters printed on paper, backlit film or Duratrans. Changing posters is a snap - quite literally - as the side profiles snap open: simply insert graphic.

Lumi Totem is double-sided: on each face there is a poster protector sheet to retain and protect your graphic image.

A particular feature of our design is that the protector is hinged down one side - so it won't fall out when changing posters.

LUMI.T

Lumi Totem
is available in 2 sizes:
600mm wide x 1700mm high
800mm wide x 1700mm high

Lumi Totem is supplied complete with a standard T8 fluorescent tube, lead and plug. It is delivered flat-packed but assembly is quite straight-forward.

Lumi Totem (below right) is for floor standing indoor applications. We can also supply light boxes mounted onto our InfoColumn poles (below left). POA.

Light boxes and Lumi Totem
All light boxes are intended only for indoor use.
They are supplied with a power cord and 13A plug.
All units pass CE/UL PAT tests and are supplied with Quality Certificates.

Outdoor

We offer 3 styles of weather resistant outdoor leaflet holders.

The DL Outdoor leaflet dispenser is a new injection moulded design sized for DL (1/3A4).

Acrylic exterior dispensers are manufactured from acrylic and are regarded as the best option.

See below for InFoPak version.

Made of flexible material similar to a blister pack

InFoPaK is an economical OUTDOOR leaflet dispenser. Leaflets are protected from the elements by a self-closing lid.

Two sizes are available, each supplied with 3-way fixings. The larger size fits A4 - the smaller suits 1/3A4 (and A5 trimmed down to 205mm wide, but it won't fit standard A5).

InFoPaK PRICES
Full Case contains: IN.3000   36 pieces   IN.2000   48 pieces

Order Code		£ ea	1 @	20 @	Case
IN.3000	InFoPaK for A4 leaflets	7.25	6.53	5.99
IN.2000	InFoPaK for 1/3A4 leaflets	5.80	5.22	4.85

InfoRack 4
with Banner Set

InfoRack 5
with Banner Set

InfoRack - *Versatile, Stylish, Value*

InfoRack brochure display stands have been developed by Green Magic to provide robust construction, stylish looks and good value.

Based on the InfoColumn circular base and substantial aluminium 2m high mast, any number of Sideshelves (up to 10) can be fitted to make a brochure display rack which meets your exact requirements.

To further open up eye-catching branding possibilities a Banner Set is included with some models. This allows any banner 400mm wide to be combined with your brochure display. Banner Set top and bottom rails come with concealed easy-to-use grippers to take paper or any banner material.

InfoRack 6
with Banner Set

InfoRack 9

InfoRack Sideshelves are made from satin acrylic with curved polished edges for a frosted 'ice' look. They can be positioned anywhere, on either side of the central column - supported on aluminium arms which are easily and securely locked into the channel profiles.

InfoRack combinations

Order Code		£ ea
INFORAK.4B	InfoRack 4 Sideshelves +Banner Set	167.00
INFORAK.5B	InfoRack 5 Sideshelves +Banner Set	185.00
INFORAK.6B	InfoRack 6 Sideshelves +Banner Set	205.00

KD.Z.TROL	Trolley case with wheels	51.00
KD.Z.BAG	Carry bag with shoulder strap	24.00

Floor-standing literature displays

■ **Real Zip**

■ **Solid Zip**

■ **Zed Zag**

■ **Real Zip** (above and below) is a great value folding literature stand - yet retaining high quality. Displays four sets of A4 brochures and can be transported pre-loaded. Includes A4 front pocket enabling branding in seconds.
■ **Solid Zip** has a real high tech look - slender and elegant. Although it doesn't fold away into a case it is still easy to take down for transport and can be re-assembled rapidly.

■ **Zed Zag** is a budget design which is very popular with exhibitors. A sturdy carry case is included in the price - great value. Two locking arms engage to keep the unit upright until it's time for breakdown and a quick getaway. Takes 6 sets of A4 brochures.

ORDER ONLINE
Open 24hrs

See opposite page for prices. More information about these products can be found online at www.sign-holders.co.uk

Real Zip folds away easily - and travels with brochures in place. To make transport even more convenient we offer a **Trolley Case** (pictured) with telescopic handle. A **Carry Bag** (not pictured) with shoulder strap is also available.

■ **Multi-sided tower** brochure display rack provides all round access to A4 brochures - twenty sets can be displayed, five per side. The brochure rack is free-standing and stable when the clear literature pockets are fully loaded.

■ **Cocktail** literature display stands come in two widths with single or double sided access to A4 brochure pockets. The stylish oval metal base and aluminium framework serve as a robust stand on which the brochure holders click into place.
